Print with 12 colour pigment ink for the biggest impact

Fine art productions never looked better with exceptional colour stability.

Photographic works come to life thanks to an ultra-glossy feel and no graininess.

4pl pigment ink droplets and precise colour calibration ensures great posters and signs in the office.

Superb pigment ink colour reproduction makes for perfect proofs.

The new 12 colour pigment ink system of the iPF5000 large format printer is guaranteed to get you noticed. Convenience, non-stop durability and the broadest colour gamut in its class ensures 17" output that's always larger than life.

Outstanding quality, versatile media and high productivity

- **Incredible 2400 dpi x 1200 dpi reproduction quality on A2+ media**, thanks to new dual-head 12 colour pigment ink system.
- **Outstanding colour stability**, ultra glossy feel and high abrasion resistance.
- **Flexible media handling** - Plain paper, CAD, recycled, glossy, proofing, synthetic, poster, fine art and sign media.
- **Highly efficient workflow with 4 media paths** - a roll, cassette and two manual - as well as automatic switching of roll media.
- **Rich software plug-ins** including powerful, yet simple-to-use poster creation software (PosterArtist) and Digital Photo Print Professional - incorporated as standard.
- **Simple** desktop operation and network installation by users.
- **Compact and quiet** - it's the output not the noise that gets you noticed.

Ideal for Proofing, Corporate, Fine Art, Photography
